HOW KALKI WORKS

One supplier between your drawings and four European factories.

Kalki Materials is a curated distribution library for the ABC islands. We represent four specialist manufacturers, chosen because their products hold up in salt air, UV and humidity — and we handle everything from specification to the delivery on site.

01

Professional-only supply

We work with architects, interior designers and contractors, not retail. Pricing, samples and technical files go to project teams.

02

Specification support

Help choosing the right system, build-ups, substructures and technical sheets for tender documents, plus physical samples for client meetings.

03

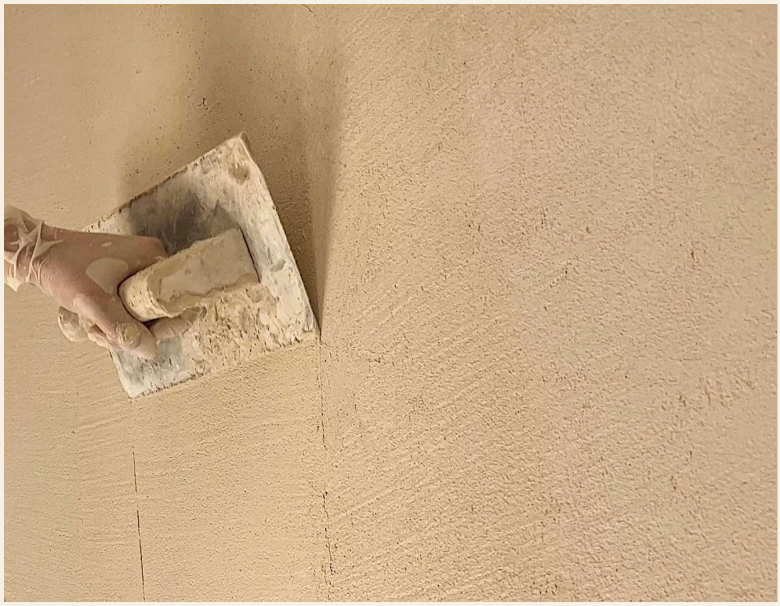

Consolidated sourcing

Floor, walls, deck and pool from one point of contact. We combine orders across brands so smaller quantities still travel economically.

04

Delivered, all-in

European materials, delivered to your door on the island. Freight, customs and import duties are already in the price you see. One price, one delivery date to plan around.

01 — ENGINEERED OAK · NETHERLANDS

FB Hout

Engineered European oak built for coastal interiors.

A European oak wear layer on a cross-laminated exterior-grade (WBP) birch plywood core, built for the humidity and coastal air of Caribbean interiors. Oak for floors, walls and ceilings in the islands.

APPLICATIONS

Floors · wall cladding · ceilings · stair treads. Villas, apartments, hotels and restaurants. Interior use only.

FINISH OPTIONS

Hardwax oil: Natural · White · Smoked. Brushed or sanded surface.

DIMENSIONS & CONSTRUCTION

Width	75 / 180 mm
Length	1800–2400 mm
Total thickness	13 mm
Oak wear layer	4 mm
Core	Exterior-Grade WBP Birch Plywood

TECHNICAL PROPERTIES

Moisture content	8 ± 2 %
Installation	Full-surface glue-down
Suitable for	Air-conditioned and naturally ventilated interiors
Re-sanding	Up to 3×
Patterns	Plank · Herringbone · Chevron

INDICATIVE PRICE RANGE
Material only, per m², AB grading.

€134.75 – €137.50 / m²

02 — MINERAL FINISH · SPAIN

Mas Maya

Lime-based plaster system, from floor to pool

Breathable, flexible and water-resistant limestone plaster, applied as one continuous surface across floors, walls, ceilings, wet rooms, facades and pools. Zero VOC.

HOW IT WORKS

A natural lime-based plaster made from limestone, white cement and plant extracts. It is built by hand in thin layers: first a primer, then the mineral coats with reinforcing mesh, then sealers, building one seamless skin of 3 to 4 mm. Breathable and flexible, it moves with expansion and contraction, which suits humid climates.

BUILD-UP · WALL / FLOOR

1 · Primer	One coat
2 · Base coat + mesh	Floor only · 2 mm
3 · Finish layer	Wall 3 mm · Floor 2 mm
4 · Sealing	Wall: optional · Floor: Presealer + Sealer
Total thickness	Wall ~3 mm · Floor ~4 mm

SUBSTRATE REQUIREMENTS

Accepted	Tile, wood, brick, plaster, plasterboard
Condition	Flat, stable, clean and dry
Surface defects	Over 3 mm: levelled with Mas Maya Prep
Wet areas	Applied over standard waterproofing

APPLICATION

Applied only by trained applicators. Kalki connects your project with an applicator on the island and supplies material, tools and colour pigments together.

INDICATIVE PRICE PER M²

Full system material, excluding application labour

Wall €50.95 · Floor €84.25/ m²

03 — EXTERIOR SYSTEM · SPAIN

Tarimatec

Decking, facade cladding and screens in Ecofiber Stone Composite

Deck, clad and screen the whole exterior with one system. Made with recovered rice husk and 100% recyclable, and built for salt air, sun and pool-side use.

RANGE

Decking	Deck Alveolar
Vertical	Annapurna · Aris
Screens	Axel · Bastión
Colours	Chromatic ×5 · Wood ×14 (premium)

DECKING

Board	150 × 27 × 2500 mm
Finish	Chromatic: Nature or Tecno
Substructure	Aluminium rastrel, 50 × 30 mm
Fixing	AISI 316 clips, A4 stainless screws

THE SYSTEM

Decking

Complete installation pack per m²: boards, rastrel, clips and screws. Slip Class 3 / R11.

Vertical

Annapurna: 40×40, 40×80, 40×160, 80×80, 80×160 mm and round Rodium. Aris: Square, Cadence, Onna, Horizon. All 3000 mm.

Screens

Axel: rotating slats for light control and room division. Bastión: slatted fencing for terraces, gardens and pool areas.

Salt air

AISI 316 clips and A4 screws; no oiling, varnishing or sanding; unaffected by insects and fungus.

INDICATIVE DECKING SYSTEM PRICE PER M²

Vertical and screens: quoted per project.

€146 - €155 / m²

04 — PORCELAIN · CASTELLÓN, SPAIN

Wow Design

Wellness collections for pools and wet areas

Small-format porcelain for the whole wet zone: pool, terrace and bathroom. Colours made to merge with the water, from white and sand to blue and graphite. Matt R11 non-slip, made for water.

COLLECTIONS

Sukabumi	11 × 11 cm · 4 colours
Marble	11 × 11 cm · 3 colours
Aqua	11 × 11 and 11 × 22 cm · 3 colours
Pixel	15 × 15 cm mosaic sheet*

TECHNICAL DATA

Body	Porcelain · absorption ≤ 0.5 %
Slip & wear	R11 / Class 3 · PEI 2 to 4
Chemicals	Class A (EN ISO 10545-13)
Tone variation	High, by design

FROM THE BATHROOM TO THE POOL

Pool lining

Selected by Wow for submerged use. Epoxy grout (RG, EN 13888) and pool-grade adhesive.

Coping & terraces

Matt R11 / Class 3 for poolside floors and coping.

Indoors and out

The same collection on walls and floors, inside and outside.

INDICATIVE PRICE PER M²

*Pixel mosaic sheets, trims and special pieces priced separately. Price shown is for the 11 × 11 and 11 × 22 cm tiles.

€73 – 76/ m²

START A CONVERSATION

Send us the project. We'll come back with a quote.

1

Send us the project

Drawings, areas or a rough brief. Tell us the island and when you need it on site.

2

We present the options

The right materials and build-ups for your project, with one delivered price. Delivery date confirmed in your quotation.

3

We deliver

Once you confirm, we ship from our warehouse in the Netherlands, clear customs and deliver to your door.

Delivered price, all-in. Installation quoted separately.
